Hot-Selling, Must-Have Products

Clenbore Small Arms Cleaning System

McNett Outdoor Products

McNett Corp. has a huge goodie-bag of high-quality outdoor products, offering everything from wash-in fabric waterproofing to camo gun-tape, Gore-Tex patches and their 100-uses GruntLine.

McNett's new Op Drops anti-fog and lens cleaning solution is listed "mission critical" by the Department of Defense for troops in Afghanistan and Iraq. You can see their entire lineup at www.mcnett.com. McNett also has a surprise firearm-related product waiting in the wings that'll be a hot seller. Call Tanya Brooks, vice president of sales, at 1-800-221-7325 to get on the company's "flash-notice list."

Cleenbore USA's Small Arms Cleaning System works like a charm! Using a CO2 cartridge, the palm-sized unit forces a polymer cleaning wad through the barrel. Next, a lightly lubed oiling wad with Cleenbore's Firepower FP-10 solution is fired through the barrel. Cleaning is done!

The high-pressure CO2 also blasts grit out of actions. Used on four fouled pistol barrels, this no-rods, no-brushes system performed surprisingly well and the whole kit fits in a cargo pocket. Adapters and wads are available for most handgun and rifle calibers, and 12-gauge shotguns. Go to www.cleenboreusa.com or call Chris Lanigan at 1-888-292-0006 for more information.
